INVESTMENT PROJECTS IN TOURISM SECTOR

Project Name:

Project of public-private partnership "Reconstruction and modernization of the State Enterprise "Sanatorium "Issyk-Kul Aurora"

Brief description of the project :

State partner: State Property Management Fund and State Enterprise "Issyk-Kul Aurora Sanatorium"

The reconstruction and modernization program contains several stages:

- reconstruction and modernization of the main building, treatment unit, kitchen, dining room, restaurants with the replacement of equipment, furniture, change of interior, construction of a sports complex with a stadium and running tracks,

- re-equipment of the beach area with the installation of an aqua-park, reconstruction of access roads, roads, sidewalks, modernization of the irrigation system, landscape design of the park;

- Construction of one-, two-, and three-story cottages for seasonal and year-round functioning

Currently, tourism, as one of the most profitable export industries, makes a significant contribution to the economy of many countries engaged in this type of activity. The level of development of the tourism industry in the country is largely determined by various social, cultural and economic factors, the political situation and the external attractiveness of the country that receives foreign tourists and develops external tourism

Amount of investment

60 million U.S. dollars

Project name:

Project of public-private partnership "Construction of the boarding house Altyn-Bulak

Brief description of the project:

Boarding house "Altyn-Bulak" has been in operation since 1975, and during the entire period of operation no major repairs were carried out. Currently, the boarding house is in need of repair.

The area of boarding house - 3,19 ha, including fixed area 2,6 ha, beach area - 0,59 ha. The boarding house is located on the shore of the ice-free Lake Issyk-Kul in the village of Sary-Oi in Issyk-Kul region. There are all necessary communications.

It is planned to build 2 buildings for 250-300 people, 14 cottages, a canteen and a conference hall.

For many years the sphere of services is one of the main sources of profit attraction. By providing quality services and creating appropriate facilities for recreation will increase the cost of services provided by the boarding house, which in turn will replenish the budget boarding house

The amount of investment - 1 million U.S. dollars

- The first 3-story building 60 double rooms;
- The second 3-story building 60 three-bed rooms;
- Conference room and dining room for 190 seats;
- Reconstruction of the beach area

Project name:

Modernization of the Bar-Bulak recreation center (Bar-Bulak village, Ton district)

Brief description of the project :

Health Center "Bar-Bulak" is different from other spas for its hot baths, which have unique healing properties

On the territory of the center there is a hot spring, which refers to the thermal waters. The temperature of the water varies between 40-42 degrees Celsius. In terms of composition, the water is mineral drinking therapeutic table water and is close to the unique Alma-Ata type in terms of chemical composition.

Water cures the following diseases:

- Diseases of the musculoskeletal system;
- Diseases of the gastrointestinal tract;
- Chronic gastritis, ulcers;
- Diabetes mellitus;
- Diseases of the genitourinary system;
- Bronchitis and asthma

The center is located on the shore of Lake Issyk-Kul

Current status:

The center provides treatment, accommodation and meals. The cost of treatment for one person is 1500 soms per day

The amount of investment - \$670 thousand

- Completion of the construction of a hotel with 100 beds - \$300 thousand.
- Construction of a 50m swimming pool - \$350,000.
- Landscaping of the territory - \$20 th.

Project Name:

Establishment of the Scientific Clinical and Rehabilitation High Mountain Center of the Kyrgyz State Medical Academy named after I.K. Akhunbaev. I.K. Akhunbaev

Brief description of the project:

KSMA named after I.K. Akhunbaev is one of the first universities in the Kyrgyz Republic, where specialists have mastered modern methods of treatment of many diseases, has a highly qualified staff, constantly invites highly qualified domestic and foreign specialists in various medical fields within an extensive business network

The goal of the project is to build a scientific clinical and rehabilitation high-mountain center on the Toho-Ashuu Pass to improve the health of the population of the republic and other countries in the conditions of high-mountain stationary, as well as to develop new science-based climate-environmental methods of treatment

In the practice of treatment of such diseases as bronchial asthma, hypoplastic and iron-deficient anemia, chronic leukemia, hypertension, obesity, neurocirculatory dystonia, primary thyrotoxicosis, diffuse toxic goiter and others, training patients to hypoxia in medium and high altitude conditions has long been used

Stages of implementation:

Stage 1 - Construction of scientific clinical and rehabilitation high-mountain center of NKRVTS KSMA named after I.K. Akhunbaev for 100 beds;

Stage 2 - Equipping of the center with medical, household and transport accessories;

Stage 3 - Training and specialization of doctors (including sports doctors) and auxiliary medical personnel for work on rehabilitation of patients in the high-mountain center

Amount of investment

2.2 million U.S. dollars
